

# REMOTE LEARNING

©2020 INDIAN COMMUNITY SCHOOL, INC.

**Greater interaction with teachers** using Google Meets, live stream and recorded lessons and additional new teachers who will work closely with classroom teachers to provide direct support to students during Remote Learning.

**New learning management system (LSM) software** will provide a cohesive platform for lesson plans and student assessments. Our new LSM will also simplify the number of tools that families have to navigate and put more information at parents' fingertips.

**Greater academic rigor and accountability** of learning through our new standards based grading and reporting. Recording of attendance for students learning remotely at home will also improve accountability toward student achievement.
